FRONT

Why choose Asimco as your partner for shock absorber?

- Asimco is the specialist in all the around the wheels products
- Asimco products are manufactures according to Original Equipment specification
- Asimco is produced in the biggest shock absorber factory in Asia
- Asimco provide high quality products at very competitive pricing
- Asimco offers one of the largest car park coverage for Asian vehicles

Years of experience and investments on research and development have made Asimco a rising star in the automotive aftermarket business. And those same high standards have helped make us market leaders in a lot of countries. Starting from brake pads, brake discs, shock absorbers, fuel pump etc...

Why it is Crucial to Choose Asimco Shock Absorber:

- Reduce braking distance
- Increase road holding
- Maintain comfort
- Limit tyre wear
- Reduce deterioration of other suspension components

Asimco recommends replacing shock absorbers every 80,000 KM or every 4 years whichever comes first. But sometimes shock absorbers should be changed if you notice one of the following:

- Excessive boune on bad roads
- Excessive body roll
- Vehicle front dive down while braking
- Vehicle veers in a side wind
- Vibration of the steering wheel
- Whenever you have unusual tyre wear

Asimco Range of Shock Absorbers:

Twin-Tube Shock Absorbers

ASIMCO Twin-tube Shock absorbers gives a satin-smooth ride plus the better response only gas shocks can deliver. They have a hardened chrome plated piston rod, multi-lip oil seal, rebound and compression valves, seamless end eye-ring and/or high quality piston ring and/or high quality rubber bushings. The selected quality materials and state-of-the-art, technology for designing and manufacturing ensure ASIMCO Twin-tube Shock absorbers providing customers with stable, comfortable and safe driving experience at all road conditions.

Strut Cartridge Shock Absorbers

ASIMCO shock absorbers can ensure achieving the double functions of the struts and cartridges, they are manufactured with high quality and high mechanical properties materials to ensure the high performance and dimensional robustness. The Nitrogen Gas charged struts and cartridges are developed with advanced technology and will provide struts and will provide you excellent road control and superior steering experience. The pressurized gas prevents air bubbling in the hydraulic fluid and vacuum in the working cylinder which provides smoother fluid flow.

Shock With Spring Seat Shock Absorbers

This kind of shock absorbers integrates many features that give you the benefits of excellent road control and the superb handing response. Together with fully self-adjusting valves and hardened chrome plated piston rod, the selected quality materials and constructional features minimize breakage and leadage, our shock absorbers meet the most demanding driver's satisfaction. The pressurized gas charged shock absorbers provide the driver even better riding experience as the charged Nitrogen gas reduces the aeration or foaming inside and optimizes the performance and durability.
